

Dear PECO Customer:

Every day, PECO provides safe, reliable, affordable and clean energy for our customers and the communities we serve. As part of our commitment, we're replacing our existing natural gas equipment to enhance service in your neighborhood. This includes installing new underground pipe, which is more durable, enhances safety and improves service reliability.

- Work is expected to begin ^{7:30} ~~xx/xx/17~~ ^{8/14} in the area of Nether Providence Township, from 7 a.m. – 4 p.m.
- This project work may occur in roadways as well as on sidewalks and potentially on your property.
- We anticipate the natural gas main and/or service line installation portion of this project will be completed in 4 weeks.
- To ensure your safety and the safety of our crews, we may need to temporarily shut off natural gas service for a short period – approximately 4 to 8 hours – while we install the new service line to your home.

You will need to provide access to your natural gas appliances or equipment in your home so we can perform this work, and later that day to restore service and relight any appliances.

At this time we also will be relocating any indoor natural gas meters to the exterior of customer homes. All Pennsylvania natural gas utility companies are required by the Pennsylvania Public Utility Commission to relocate indoor natural gas meters to the exterior of customer properties. If our meter is located inside your home, you will need to provide access so this work can be completed.

This work will be performed by INTREN/Miller Pipeline, a qualified PECO contractor. If you have any questions regarding this project and for scheduling purposes, please contact Brittany Fannon of INTREN at 484-351-8407 or 224-230-9924.

Any areas impacted on your property will be repaired, the streets will be repaved, and all areas will be restored to their original condition.

- We will begin to restore your property in the month following the completion of our work to install the new natural gas equipment.
- Work to repair and repave area roadways will begin within 45 days following the completion of the natural gas main and service line installation work, weather permitting.

If you are not currently using natural gas and are interested in learning more about the conversion process, please call 866-685-5665.

Sincerely,

PECO Gas Operations
